Dear Township Committee,

We are a new family to the Vista Ridge A-2 development. We have greatly enjoyed living in this solitude, after moving from a 0.2 acre Rochester parcel. We have sought for so long to find this beautiful piece of land and feel so blessed to have found it. With that said, we do understand why it is desired to develop the Moon Farm property into smaller parcels, so that more people can enjoy what we are experiencing.

The difference, however, is that our little 5 acres is surrounded by forty acre parcels. Not five to ten acres per parcel. We bought this land knowing that it would be A-2 zoning so that we could enjoy the vast canvas surrounding us. That is forty acres of natural beauty, a dark night sky for our kids to see the stars in abundance, hundreds of acres of wildlife and birds in an unaltered landscape.

We wish for it to be considered to leave the Moon Farms acreage as A-2 zoning so that there will be no impact to the aforementioned benefits of country living. We do not want to see the night sky filled with light, like when we lived in Rochester. Nor do we want to see traffic increasing on the peaceful back roads where we enjoy walking with our family and dogs. Please consider leaving this rural gem of Byron A-2.

Thank you,

The Burrows Family
