Dear Rochester Township Planning Commission,

I would like to voice my opinion regarding the recently proposed amendment concerning the development near where I live between Meadow Crossing Road and Bamber Valley Road. I strongly oppose the proposal to increase the number of lots as it will provide no benefit to the citizens of Rochester Township, only additional profit to Clark Development. Those of us who live here chose the place because of the country feel with a very low density of houses. Increasing the density of homes in the area does not benefit a single resident who lives here now or in the future. Clark Development should stick to the original agreement.

Thank you,

Michael
